

FISHING KNOTS — FIELD CARD

Wet every knot before cinching. Seat it with steady pressure, not a jerk — then pull-test before you fish it. Rig order: braid → *Double Palomar* → snap swivel → fluoro leader → snap swivel → jig.

DOUBLE PALOMAR KNOT

Braid to swivel

Double it: repeat steps 3-4 — a second overhand wrap through the same loop — before passing the loop over the swivel. That second wrap is what keeps slick braid from slipping.
